

New SEND School, Scunthorpe Planning Application

Wellspring Academy Trust and Morgan Sindall Construction, working in partnership with North Lincolnshire Council and the Department for Education, are excited to let you know that a planning application will soon be submitted for a new Special Educational Needs and Disability School on West Common Lane in Scunthorpe.

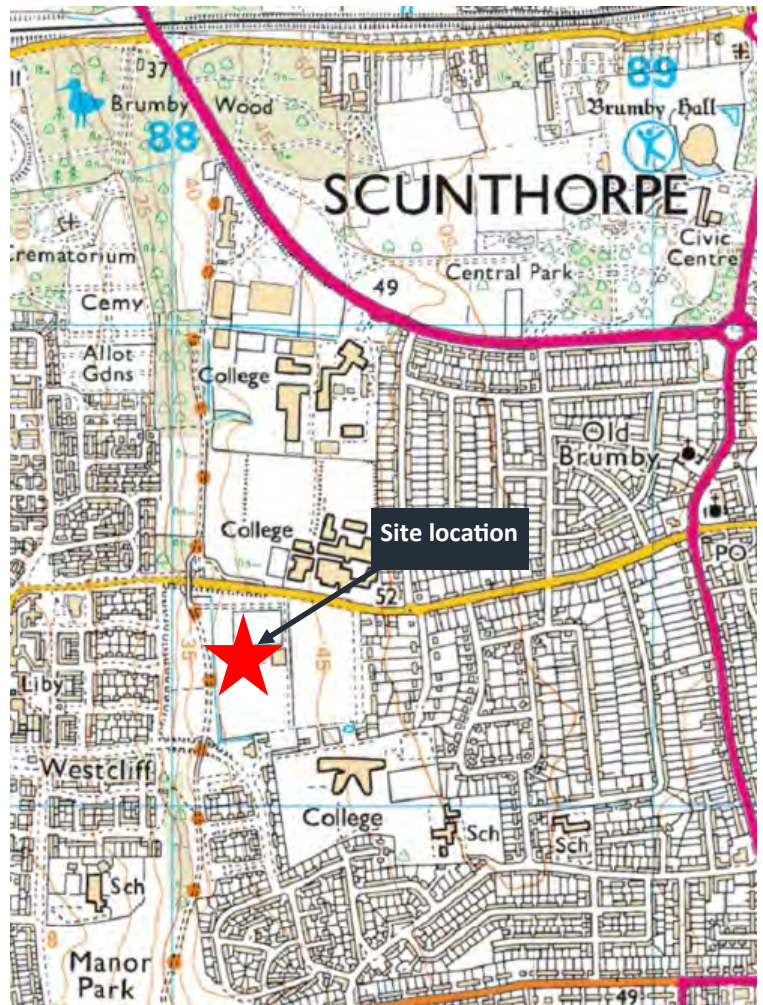

The new school will cater for 60 students aged between 16 and 19. It will support students with a range of specific needs including those with learning difficulties, speech language and cognition needs and autistic spectrum condition.

The new school will be located next to the John Leggott Sixth Form College car park and the Amber Gateway Adult Social Care Centre. It will be accessed from the existing road junction on West Common Lane.

The building will be 1-2 storeys high and will be designed to 'Passivhaus' standards, which means it will be built to the highest standards of sustainable construction.

The school will be delivered by the Department for Education (DfE) as part of their free schools programme.

Morgan Sindall has been selected by the DfE to design and build the school. Morgan Sindall is a construction company with lots of experience of building schools.

Please send in questions or comments no later than Monday 7th June 2021

New SEND School, Scunthorpe Planning Application

At this pre-application stage, the development proposals can be viewed online and you can also contact the Morgan Sindall design team if you have any queries or comments. Details are at the bottom of this page.

Morgan Sindall will be submitting the planning application in mid June 2021. Once the application has been submitted, it will be available to view and comment on online via North Lincolnshire Council's planning portal: <https://apps.northlincs.gov.uk/>

Subject to achieving planning permission, construction will start on site in October 2021, with the completion of the school scheduled for September 2022.
